Dr. Raymond Green
45 South Main
Heber City, Utah 84032

Dear Dr. Green:

As you probably know I am an Optometrist with a private practice in Heber City. I have practiced locally for ten years with the goal of providing quality eye care to the residents of Heber and surrounding areas.

Recently I helped with a visual screening at the county health fair in Heber and was surprised to find many people didn't know there was an Optometrist in town. In an effort to increase public awareness of the services I provide I would appreciate you informing your patients about me and would sincerely welcome the opportunity to provide services to any of them that require visual care.

Some of the services I provide are: refraction, ophthalmoscopy, binocular skills testing, visual fields evaluation, orthoptics (visual training), and low vision. Additionally I fit contact lenses and eye glasses and have a wide variety of frames and lenses available.

John P. Gleave, O.D.

If there is any indication that medical care may be required I customarily refer to the patients local physician, an eye surgeon, or other specialist when necessary. When a patient is referred by a physician for a specific problem I always report my findings to that physician and defer to his or her judgement regarding future referral.

I welcome the opportunity to assist in meeting your patients health care needs locally and would be glad to discuss any questions, input, or concerns you might have. My Optician and Secretary-Receptionist is Suzanne L. Mair. Please feel free to call or drop by any time.

Sincerely,

John P. Gleave, O.D.
